We take it for granted, however, that the latter word used as synonymous with the former. And that is just the sort of ticket which we would like to see General Ma-Boxe run, but also just the sort he is not going to run. Oh, no. The delegate resolution turning from the Staunton Convention pointed out General Manore's only resort when he told the Lynchburg News that the transfer been guilty of much of injustice.

There's the only chance for the Manne party; and we predict that the General will either avail himself of it or the only card he now hes to play. His influence in the Democratic party is at an end. He cannot bear to be without followers. Who will follow him? The wegroes are his Convention but the Funders. In the first place, the whole number of Funders! votes cast was only 145,317 (this is for senators-the total for delegates seems to vary somewhat from the above) as against 235,228 votes in the presidential election of 1875. If we were to add the entire Republican vote of last year to the Readjuster vote of that year, the total would be only 82,395, or 47,275 less than Mr. Traden's vote. Now, the Republicans will certainly vote for General GRANT. The negroes are bent upon doing that. Both factions in the Staunton Convention, the MAHONE coalitionists and the straight-out Republicans, had to profess to be for General GRANT in order to have any influence with the negroes. So it

Where does the Whig find its 20,000 majority? There is no foundation that we was referred to the Finance Committee, where it seems likely to remain. So in this district we have credited all the votes to the Debt-Payers, though a few of them may have been cast by Readjusters. We repeat that between one and Thirty-fifth—and it leaves 54,966 for the Debt-Payess, and only 53,169 for the Readjusters. Where is that Readjuster madone in other places, compel a full support of 40,000 (!!) which Mr. Peck claims of the schools, and it will be better for all in the Whig of sesterday?

To see bow liberal our table is to the Reactiusters, the reader has only to analyze it closely. In the Albemarle district, for instance, which elected a Debt-Payer to the Senate, which elected a Debt-Payer to the Senate, we have not set down a single vote for our side, although Colonel Dux was side to the House of Delegates in Albe-March, 1856: arle, and Greene county was represented by a Bebt-Payer.

In view of these figures, and of the fact that the negroes or Republicans will all vote next fall for General GRANT, we again ask where is the unpledged electoral ticket

to get its votes? We wish to say to the Southern Intelligen

cer, which quotes the word as if we had used it, and to the Whig which copied the article, that we have never called the negroes "bestial," or by any other opproblous term. The chronic office-seckers will run again this spring. We shall have one of the defested and disappointed tribe running for City Sergeant, another for Commissioner of the Revenue, others for the Council, and others no doubt for other offices. We shall of course see some wes running for office who have not been defeated beretofore; but these will be only such as belong either to the tribe of grundlers, or else hive a higher epinion of their qualifications for office and of their popularity than their neighthe schemes which have ever been mentioned for preventing Virginia from voting for the Democratic nomines for President, that of running an impledged electoral ticket in the least promising. DR. JOHN T. METCALF.

CASE OF DR. P. W. YOUNG, OF OXFORD, N. C.

in the Confederate States Army.

[Extract from letter of January 29, 1880.]

"In the month of Anuart, 1879, prostrated by a severe attack of Gout, with which I had then suftered for several months, and in such a condition that I scarcely hoped ever to be able to results active professional life, I visited the Buffalo Lithis Springs. I was without appelite; my digestion limperfect and painful, my nervous system shattered, and the victim of neuralgia in all its forms; my spirits greatly depressed, and so feeble that I could walk but a short distance without assistance. The first noticeable effect of the water was upon the ecretion from my kidneys and skin, both of which were acting very imperfectly and fating properly deput and been for months scarty, high-colored, of high specific gravity, very acid in its reaction, and depositing upon standing a very large sediment. The action of the water was apparent in forty cight hours, the sycretion becoming more abundant, less blothy colored and depositing less schiedly colored. action of the water was apparent in forty cirble hours, the secretion becoming more abundant, less highly colored, and depositing less sediment. With the re-establishment of a healthy state of these two important secretions, the great depurators of the blood, my convalescence was soon and rapid—my appetite returned, my digestion became perfect, and my nervous system regained its tone. I became more cheerful and hopeful and gradually regalize my strength. My general health is now perfect, and I have resumed the active practice of my second in the second providence. I feel that I am entirely indebted to the little fail Littlia Waters.
